ANDREI MIHALE

Full-Stack JavaScript Web Developer

PROFESSIONAL EXPERIENCE

Founder & Developer

LinkTech Development | May 2022 – Present

- I offer advisory services to different enterprises for their web-related projects.
- Design and implement web-based projects in a professional and effective manner.
- I have been involved in multiple projects across diverse fields.
- I have experience working with various technologies such as React, Angular, Node.js and Next.js.
- I have successfully developed applications that have proven to be effective in reducing annual business costs while simultaneously increasing traffic generation.

Full-Stack JavaScript Web Developer

IBM | January 2019 – April 2024

- I played a key role in the completion of four separate projects by guaranteeing the delivery of excellent solutions.
- I fulfilled clients' style and functionality preferences while implementing and providing them with new features.
- Maximized the efficiency of the application and devised original concepts to improve its overall capabilities.
- On a daily basis, I have had the opportunity to interact with clients and engage in discussions with them, showcasing my exceptional client-facing skills.
- I have worked with a range of technologies, such as Angular, React, and Node.

PROFILE

I'm Andrei, a seasoned Web Developer with a strong background in both front end and fullstack development. Over the past five years, I've dedicated myself entirely to web development, catering to various platforms including desktop, tablet, and mobile.

My journey began in front end development, and over the course of + five years, I transitioned into a fullstack role. Throughout this time, I've been proud to call IBM my professional home.

My project portfolio is diverse, spanning from internal tools and chat boards to extensive e-commerce platforms tailored for international clients. Notably, I spearheaded a long-term e-commerce project, leading the development of critical functionalities such as checkout, payment systems, and backend administration dashboards.

My initial project involved working on insurance tools, providing me with valuable experience in internal tool development. While my expertise lies in development, I am equally proficient in maintenance tasks.

Throughout my career, I've held roles such as Tech Lead and Backend Lead, conducted training sessions on JavaScript, and actively participated in recruitment processes, including interviews and intern mentoring.

I thrive in dynamic environments and have successfully managed multiple projects simultaneously, predominantly within the B2B sector. My dedication to continuous improvement and my passion for development make me a valuable asset to any team.

- Evaluated the capabilities and qualifications of project candidates and those specifically applying for IBM by conducting technical interviews.
- I led Agile ceremonies such as Sprint Grooming and Sprint Retrospective, in order to promote efficient and well-structured collaboration within the team.
- I provided effective support to my colleagues in completing their tasks, quickly resolving any issues that arose, and conducting thorough code reviews.Assisted colleagues by effectively supporting them in tasks, promptly resolving blockers, and conducting code reviews.
- As the head of the back-end team, my primary responsibility was to guide and direct all our efforts towards ensuring the project's success.

EDUCATION

Bachelor Degree of Electric, Electronic and Telecomunication

University Politehnica of Bucharest| 2020

CERTIFICATIONS

- AZ-900: Microsoft Azure Fundamentals
- First Certificate in English
